

Submitter: Genny Bond

On Behalf Of:

Committee: Senate Committee On Labor and Business

Measure: HB3213

To the Senate Committee on Labor and Business:

I urge you to approve HB 3213, which prohibits manufacturers from selling or offering to sell cosmetics developed with animal testing. I am so encouraged this bill has made it this far, and I hope you will carry the ball across the finish line! Animal testing is becoming widely acknowledged as unnecessary and cruel. Mainstream cosmetic manufacturers are advertising the fact their products are cruelty free, in mainstream television ads---such a positive development! This bill will help to push the remaining manufacturers into modern times and get them past the practice of animal testing.

Thank you,

Genny Bond
