

Submitter: Joseph Herbert

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB3550

IMMEDIATELY Should take effect IMMEDIATELY, not two years away.

This is a CLIMATE EMERGENCY.

We have ZERO time to lose.

Investing NOW in our future will reap far greater benefit — in AGRICULTURE and TIMBER REVENUE — versus waiting until 2025.

(The cost-benefit is vastly superior, in terms of atmospheric pollution, water/soil contaminants from eg motor-oil, etc etc)

Some of those pollutants stick around for DECADES.

Better for our family farms & dairies etc!
