

Reference: Right to Rest Act. House Bill 3501

Or, I think it should be named, the "We're Number One!" bill!

What ever its name, the bill is a brilliant idea! Oregon will form the nucleus of the greatest concentration of homeless people in the country!

We'll be Number One! Pure. Genius.

I have some modest suggestions: we could recruit people to our homeless-friendly state so they could enjoy the full power of our legal protections of home ownership as well as other benefits!

As a first step, we could advertise the benefits of moving to Oregon in Mexico and all the countries of Central and South America! The advertising should be widespread and attractive, and we could even subsidize the relocation citizens of other countries emphasizing their homelessness here would be offer them the unique benefit only Oregon will offer!

On the west coast, we could outcompete LA, Seattle and San Francisco for their homeless populations emphasizing the same benefits, and subsidize their relocation too. That would fast-track people into the system!

Given that many of the homeless are addicted to alcohol and/or drugs, we'd be close to cornering the market on hard drugs, which are an informal or formal right which our homeless people enjoy!

Think of the wonderful medical experience gained by our hospital personnel who will treat our newest friends.

As a bonus, lawyers will get rich suing people for violating the

rights of the homeless!

In closing, let me once again reiterate that this bill is Sheer
Genius!
