

Submitter: Ron Riddle

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB2098

I'm in favor of building a new bridge over the Columbia river. It must be a bridge for the future growth of Oregon and Washington. A bridge with enough space for all user to traverse safely. The goal should be, to keep traffic in all of its forms moving freely during all hours for the day. Wide shoulders to move disabled vehicles to the side, auxiliary lanes to move entering and exiting traffic along the roadway without hindering through traffic. The construction cost of the bridge should be paid for out of the general fund.
