

Submitter: Ralph Newton
On Behalf Of:
Committee: Senate Committee On Judiciary
Measure: HB3443

"The welfare of the people in particular has always been the alibi of tyrants, and it provides the further advantage of giving the servants of tyranny a good conscience". A Camus. As expected this "legislature " is only interested in two things, #1, promoting and furthering a socialist democratic system of government, by way of virtue signalling bills like HB-3443, etc., and #2, making sure the "piggy bank", (That's you and me, Oregon's long suffering Tax Paying Citizenry), just goes along quietly and pays those taxes on time, because we have such great scenery..And beaches!, lol. Not going to address the obvious lunacy in bills like HB-3443, SB-348, HB-2005 ,HB-2002, etcetc, except to state the obvious, because what's the use. These are "payback" bills because big money donors require performance for their dollar, and national party rulers require state and local party adherence to party agenda, We're heading for the shoals and the captains passed out drunk in his cabin, I'm not sure why the Electorate continues to install you dangerously unbalanced individuals in office, but thats almost more unsettling.
