

I am shocked that this bill is being put forward! Portland is dying and the homeless are a big part of the problem. I am in the Woodstock neighborhood, and it is being overrun with homeless. The businesses are getting robbed blind, my children can't safely walk down the street, and there is drug paraphernalia and trash everywhere. They contribute nothing to society, and openly drink and do drugs, and steal because they know nothing will happen to them. And the tax paying members of this community suffer because of it. Anyone with half a brain knows the city is enabling this problem, we are a magnet for drug addicts because of measure 110, and the lack of enforcement with our laws. People are leaving the city, and it will only get worse if this bill is allowed to pass. Please do not allow our city to continue in this downward spiral. My family has lived here 20 years, and we are actively talking about moving out, this law would speed up that decision. I am sure we will not be the only ones.
