

Submitter: Emily Herbert

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB2098

The need for improvement is clear, however, I oppose the -2 Amendment. Because it is still not "right" sized. The expansions in the Rose Quarter and widening to hold more traffic will just make it too expensive and wrong for the coming age of electricity and alternative transportation. Please vote against -2 and consider -3. The pollution caused by this colossal project is also a consideration to be dealt with as cleanly as possible. Thank you for your dedicated public service.
