

Submitter: Susan Haywood

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB2098

I oppose HB 2098-2.

I support HB 2098-3.

I support replacing this bridge, but oppose HB 2098-2 because this legislation as currently written jeopardizes a right-sized bridge replacement. I support HB 2098-3 amendment and the policy recommendations offered by Just Crossing Alliance.

Let's plan for the future and increase mass transit instead of building more infrastructure to add more freeway lanes to our city and bridge.

Thank you for considering our climate emergency when making this decision.
