

Submitter: Alexandra Bruckner

On Behalf Of:

Committee: Senate Committee On Natural Resources

Measure: HB3458

I am principally against any bill that contains the word "limits" unless the limits are put on the government. We are a free people, and the Constitution puts limits on the government, not the people. Limiting which issues can be the basis for appeal of land use decisions may put farmers at risk, destroy our beautiful state as more of it is developed, giving big developers and investment agencies more power to wield over the "little guy." This is not fair for the everyday person or our ecosystem. I oppose HB 3458.
