Government, and Veterans

Measure: HB2410

I believe that the tax dollars for the lottery should be used towards the pool to help the youth in community safe and also to teach them water safety. Children currently don't have a location where they can feel safe enough from their home and from their current environmental in the county with more than just nine dispensaries around this community providing tax dollars for the lottery tickets to at least help them stay away from the community that puts them at harm can also put parents at is at their children are around mentors are able to teach them safety, and also provide them correct or activities in that process
