

Submitter: Robert Marquis  
On Behalf Of:  
Committee: Joint Committee On Ways and Means  
Measure: SB5506

I strongly urge the committee to support all of the climate- related bills currently under consideration, which will help Oregon by creating jobs, sequestering carbon, implementing resiliency in new building construction, and other strategies to reduce our reliance on fossil fuel and take steps toward addressing the larger issue of climate change. Thank you for taking my comments. I hope these bills will make it to the floor and ultimately get passed into law in Oregon.
