

Submitter: Sharon Waterman

On Behalf Of:

Committee: Senate Committee On Rules

Measure: SB85

Oppose SB 85. Regulations are already in place to ensure CAFO's are environmentally friendly and the operations are governed by the Oregon Department of Agriculture. Consumers want safe, healthy, local food and these rules will impact every consumer. Animal food (milk, eggs, meats) prices will increase, locally grown products will decrease, and there will be more animal foods coming from sources which we have no idea how they are being raised or what they are fed. Please oppose SB 85!
