

Submitter: Brandie Henderson

On Behalf Of:

Committee: Joint Committee On Ways and Means

Measure: SB5506

This is a common sense measure to get children the items needed to have access to sound. We would t deprive a diabetic if insulin being covered so why would we deny coverage for a child to have properly fitted ear molds to hear? Children need all of the equipment and appointments to have access to language and without the coverage it becomes cost prohibitive to so many families. Please make sure this bill to hold insurance companies accountable goes through.
