

Submitter: Susan Haywood

On Behalf Of:

Committee: Senate Committee On Rules

Measure: SB85

Thank you, Chairman Lieber, for working on the text of this bill in committee. I understand that Senators Dembrow and Golden also put forth significant effort to produce this iteration of the bill. Thank you, all.

As a retired biology teacher, I have experience raising chickens and turkeys and am now developing a permaculture/native plant garden in SW Portland.

I support SB 85-4 and am so glad you have sought to protect communities, land, and water with this new amendment, while not making it onerous for small and mid-sized farmers and ranchers.

Please vote yes, and pass it out of committee!
