On Behalf Of:

Committee: Senate Committee On Energy and Environment

Measure: HB2426

i believe this is a bad idea. when you have no one at the pump then skimmers can be added to unattended machines. Many people are not safe when they are pumping gas, have not been trained properly and put others at risk. I hope this does not pass. if owners can't find employees it is because they don't pay enough. i know plenty of people who would do it for \$20/hr.
