

Submitter: Rick Staggenborg MD
On Behalf Of: Oregon taxpayers teachers and students
Committee: Joint Committee On Tax Expenditures
Measure: SB5

I find it amazing that the legislature is considering repeating a mistake it only recently corrected by eliminating the previous R&D tax credit. Since then, investment in R&D as a share of the Oregon economy has outpaced most other states, so why are we talking about spending tens of millions on bringing it back while cutting the education budget?

Please oppose this misguided bill.
