

Submitter: John Giacoppe

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB2098

I support replacing this bridge, but oppose HB 2098 -2 and -4. I support the -3 Amendment simply because it delivers accountability, which has been sorely needed with infrastructure projects of late, and builds towards our certain future, rather than attempting to prolong an outdated, auto-centric transportation network that will kill our planet if allowed to grow any further. We have greater needs elsewhere than added lanes to an interstate bridge. Fund those instead.
