

Submitter: Andres Marin-Hardy
On Behalf Of:
Committee: Joint Committee On Transportation
Measure: SB422

Hi my name is Andres I'm a newer motorcyclist of a year and I personally believe SB422 will help motorcycle riders across the state tremendously. I personally commute from Beaverton to the Portland International Airport and have found traffic to be an issue everytime I make the drive. I believe passing the bill will help those that commute and have the option to ride to do so. I currently already see drivers politely giving motorcyclists the option to filter between to lanes when traffic is moving extremely slow and no one ever has an issue with it. I also believe it'll make a small dent in our traffic situation to alleviate some of the congestion on the busier parts of the day. Thank you for your consideration.
