

Submitter: Ashley Enockson

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: SB422

Motorcycles are air cooled. Meaning, if you're stuck in traffic you have the choice between breaking the law or doing permanent damage to your engine and ending up with burns on your legs. It also would significantly reduce the likelihood of being rear ended by drivers who aren't paying attention. Lane splitting is of little risk to drivers in vehicles would be a tremendous relief to motorcyclists.
