Committee: Joint Committee On Transportation

Measure: SB422

Lane splitting or filtering at least should be legal. Everytime I sit at a stop light I wait in anticipation for someone to be looking at their phone, not see me stopped and rearend me. In a car getting rearended may be a concern, but on a bike it's life threatening. Drivers aren't attentive and filtering would make me feel 100 times safer. This law needs to be passed.
