

Submitter: Eric Lund

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: SB422

Please pass this. Include whatever common sense provisions you deem necessary but for the love of God when traffic is slow let us drive on through. It's safer and relieves congestion. It encourages smaller motorcycles which cause way less wear and tear on roads than heavy cars. People getting where they need to go quicker which means less idling helps with pollution. Did I mention it's safer? Might seem counter intuitive but it really is. Just better all around.
