Committee: Joint Committee On Transportation

Measure: SB422

I don't remember the first time I lane split, but I remember teaching others on their first time. Every person I've taught has remarked something like "that was easier than I thought!" And they rode happily ever after. Lane splitting is valuable technique that not everyone can do, but everyone should have access to if they so please. No one knows the dangers more than the rider, leave it to the rider's discretion.
