

Submitter: David Palomino
On Behalf Of:
Committee: Joint Committee On Transportation
Measure: SB422

I fully support this bill and urge you to pass it. I am a long time motorcycle commuter and one of the situations where I feel most exposed and in danger are in stop and go situations on the freeway. Several years ago I was rear ended by a driver who did not recognize that traffic was stopped in front of him on the freeway. Thankfully I was in my car, which was totalled. Had I been on the motorcycle I would have been dead or seriously injured. Having the option to filter and remove myself from situations like that would greatly improve my defensive options as a rider.
