

Submitter: Andrew Callaci  
On Behalf Of: Vespa Portland  
Committee: Joint Committee On Transportation  
Measure: SB422

Riders need options to keep themselves safe on the road that utilize the specific strengths of scooters and motorcycles. These strengths include the ability to quickly accelerate out of danger, having an unobstructed 360° view with a turn of the head, and a small footprint. Allowing lane sharing will give Oregon (and out of state visiting riders) a sense of safety being in their own hands. Additionally it will provide traffic congestion relief with no added expense to the public. Thank you for voting in favor of lane sharing in Oregon.
