

Submitter: Andrew Robottom

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: SB422

I am an Oregon Motorcyclist and I strongly support SB422. I ride almost everyday. I am a Registered Nurse and use my motorcycle to visit patients in the great Portland region. I ride defensively at all times, but one situation with limited defensive options is the possibility of a rear end collision and being hit by a distracted motorist.

SB422 will provide me with an opportunity to limit opportunities for a rear end collision, and do a great deal to make sure I am able to reach my vulnerable patients in the community.

Andrew M. Robottom RN
