

Submitter: Stephen Snyder
On Behalf Of:
Committee: Joint Committee On Transportation
Measure: SB422

As motorcycle rider with 55 years of riding experience I would like to ask you to please support SB 422. I have used a motorcycle as my prime mode of transportation most of my life. During this time I have be hit from behind by cars 3 times. If I had the ability to lane share as described in this bill the contact could have been avoided. In our modern society you have to ad cell phones to the equation. Folks paying more attention to the phone than the road I think we can agree is a growing problem. Hence lane sharing is becoming more important everyday in the survival of motorcyclist. With increasing fuel cost one might think that the use of motorcycles would be something we should be promoting. Most motorcycles use less fuel. Take up less space and add less carbon to our atmosphere.

Thanks for your yes vote.
