

Submitter: Felice Kelly  
On Behalf Of:  
Committee: House Committee On Rules  
Measure: HB3414

This bill would erode urban shade and leave residents even more vulnerable to climate change. The housing we build now, and the environmental impacts of that housing, will be with us for decades to come, so we should ensure that existing environmental regulations are followed to make that housing green and climate-change-ready.

Thank you.
