

Submitter: Quentin Wilson
On Behalf Of:
Committee: Joint Committee On Transportation
Measure: SB422

I am in full support of any legislation that allows more freedom for motorcyclists to safely avoid traffic congestion. I have a full decade and well over 100,000 miles of motorcycle experience splitting lanes when I lived in the Greater Los Angeles area for a decade. It is difficult for us as motorcyclists to explain how much safer it is to be slowly moving past cars instead of stuck in their blind spots or waiting to get crushed from behind by an inattentive driver. The last decade of smart phone use has made this issue exponentially worse. Please focus on the Berkeley Study on filtering that detailed how safe it is.

Thank you,

Quentin Wilson
