

Submitter: Elizabeth Richardson
On Behalf Of: Oregon
Committee: Senate Committee On Health Care
Measure: HB3223

To whom it may concern,

I have been in the dental feild for two years and wanting to become a dental assistant. Within the two years I have learned alot and still have so much to learn!! There is so much knowledge and skills that go into this position. We need to have certified dental assistants through the state of Oregon. You need to have people that know what they are doing when it comes to there oral health. I oppose this bill.
