

Submitter: Scott Shoen

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: SB422

We've been so close to making this law and thwarted by individuals who lack understanding of the issue. Folks who don't ride see lane splitting or lane sharing and they immediately think of the SoCal scofflaws running at 100mph. Not what it's about.

I've been riding for almost 50 years. In the last 7, I've put 64,000 miles on my bike. There have been a lot of situations which have made me nervous or scared me, but the one that is consistent is the worry of getting rear ended when traffic is slowed or halted. It's really difficult to stay tuned to the road and adequately watch your 6. Please pass it this time.

Thank you.
