

Submitter: Dana S Gurnee

On Behalf Of:

Committee: Joint Committee On Transportation

Measure: HB3382

HB-3382 as introduced was almost comical in its depravity. If it is approved in that form, without the proposed Dash-3 amendments, many other attempts will be made to nullify decent laws and to deeply damage the environment. Talk about slippery slopes!

-

Even the substantial Dash-3 amendments should be rejected. It is not right to specify which type of favored construction is morally superior to another type when it comes to observing laws.

-

The Oregon frontier is gone. Today you have the daunting difficulties of managing millions of people living alongside delicate nature. Please reject this assault on reasonable, honorable regulation.
