

Submitter: Steven Brooks

On Behalf Of:

Committee: House Committee On Rules

Measure: SB166

1. Document doesn't meet the requirements to be readable by an 8th grader.

2. Has the term May. Should be Will in section 26.

Too many changes on one document. Very confusing.

I wrote procedures for a nuclear plant. If this was presented to me for approval, I would reject it. You could not expect anyone to be able to properly implement this.

This looks like it's written to obscure the actual directions.
