

I was a smoker for 15 years and discovered vaping in 2005. I immediately jumped into the different flavors that were available and haven't looked back since I haven't touched a tobacco flavor because they remind me of the analog cigarettes which disgust me at this point, and near the end of my smoking career. I do not want to have to vape tobacco flavors at all it would potentially make me go back to smoking and not Vape at all. Please do not allow this bill any further and distinguish it it would be catastrophic for the citizen vapors in our state and cause people to have very little choices for complex taste buds, they are reacquiring since stopping smoking. I am a registered nurse, and I have watched a lot of

people successfully quit smoking and vaping by using vaping as a crutch for a little while, enjoying some of the flavors that were available. They have recovered from serious illnesses, including lung disorders, by decreasing their vaping and stopping in the end. I would hate to see this bill go any further or go anywhere into law. I believe I would lose the lives of my patients and that would make me very sad as a healthcare provider. I would also hate to see much of the administration who does Vape go back to smoking at the hospitals.
