

Submitter: Christopher Hurley

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB3090

Hello! I'd like to suggest not penalizing the responsible adults who choose to use these products but instead to penalize the irresponsible parties who sell these products without following the state mandated protocol. Much like how the DMV treats licensing and drivers who either comply, or fail to comply, all without penalizing those who comply. I'd be interested to see how irresponsible shops would behave if fines were increased to 5k for first offense and 10k second offense, with a 3 strikes you're out policy. Then a 1 year suspension on that address/location to sell any similar products. I suspect this pressure toward irresponsible parties would initiate the change desired without penalizing our responsible society as a whole.

Thank you sincerely for reading.

Chris
