

Duffle Bag follow- up information:

The tracking includes number of carriers purchased, used, and left on hand, and the number of instances trash bags were used. Between August 2023 and February 2024, 639 carriers have been used and there have been 4 instances trash bags were used. The number of # of placement changes that occurred in this timeframe is something we have asked for a data pull on but we will not likely have in time for the OLIS deadline.
