# LILLY INSULIN IS \$35 OR LESS PER MONTH\*

### **Lilly Insulin Affordability Solutions**

Lilly makes it easier for people with diabetes to access Lilly insulin

### \$35 INSULIN

#### **Automatic Discounts at Pharmacies**

Automatically caps out-of-pocket costs at \$35 per month at participating retail pharmacies for people with commercial insurance.

#### \$35 Savings Card

People who don't have insurance (or have commercial insurance and go to the minority of pharmacies that do not participate) can continue to visit **InsulinAffordability.com** and immediately download the Lilly Insulin Value Program savings card to receive Lilly insulin for \$35 per month.

#### **Lilly Diabetes Solution Center**

People who need help accessing Lilly insulin can call **833-808-1234.** 

## LIST PRICE REDUCTION & NON-BRANDED OPTIONS

#### **Insulin Lispro**

Insulin Lispro is the lowest list-priced mealtime insulin available at \$25/vial.

#### Rezvoglar

Biosimilar to, and interchangeable with, Lantus, Rezvoglar launched at a 78% discount to Lantus.

#### **List Price Reductions**

Lilly reduced the list prices of its most commonly used insulins by 70%.

Making insulin affordable for all people living with diabetes, regardless of income or insurance status, is a top priority for Lilly. But we can't do it alone. There are still gaps in our healthcare system and broader reform is needed to ensure everyone can access lower out-of-pocket cost for essential medicines, like insulin.

Legislation plays an essential role in moving us from a series of patchwork solutions to systematic change that helps people with affordability. Lilly supports:

#### **COMMERCIAL OUT-OF-POCKET CAPS**

Expanding the monthly out-of-pocket \$35 copay cap on insulin for people enrolled in Medicare Part D to the commercial market

#### **FIRST DOLLAR COVERAGE**

Exempting insulin from insurance deductibles to lower out-of-pocket costs and make them more predictable

#### **REBATE PASS-THROUGH**

Requiring pharmacy benefit managers and health plans to share manufacturer rebates directly with beneficiaries at the point of sale to offset out-of-pocket costs
