Of:

Committee: House Committee On Agriculture, Land Use, Natural Resources, and
Water

Measure: HB4132

I support this bill. HB 4132 builds on the recommendations of an Oregon State University review and is based on the best available science. HB 4132 calls on ODFW to develop an adaptive management plan for Oregon's five marine reserves and to work with communities to ensure the science derived from the marine reserves is useful and includes local knowledge.

HB 4132 is critical to the future success of the marine reserve program, and will improve ocean management. We have so little time left.

Thank you.
