

Submitter: Leslie Lukas-Recio

On Behalf Of:

Committee: House Committee On Climate, Energy, and Environment

Measure: HB4014

Beavers are a crucial part of our environment and ecosystems. As we learn more about beavers and their positive impacts on land, the water table and the environment it is essential we motivate and support private landowners to help and establish beaver populations. As the majority of habitat available is largely privately owned there is truly no other way to do this. Please support this measure. Please support this important step to preserve and better our beautiful state and its diverse ecosystems.
