Committee: House Committee On Economic Development and Small Business

Measure: HB4124

I support this bill. Our architectural heritage is our history. If we do not know where we have been, we do not know where we are going. We need the visuals of photographs and objects like architecture to ground us and give youth a foundation with a solid perspective of the role of linear values that embody the conception of time by serving as the driving force of the concept of human history, and that conceives it as a timeline based on progress. Preservation of culturally important structures achieves this important goal.
