

Submitter: Stacie Norman  
On Behalf Of:  
Committee: Senate Committee On Education  
Measure: SB1583

This bill SB1583 is unnecessary. There is no reason kids need to know sexual orientation/trans education, fiction or non fictional characters in educational literature. At this point it appears there is an all out effort to confuse young minds of their own gender and sexual orientation whether they are gay or not. Most parents do not want this agenda pushed on their children. And prefer to have discussions in the home on these topics.

The fact that it is starting as young as kindergarten to sexualise childrens young minds is unfathomable to me and many I know.

If this was just sharing historical figures for their contributions based on character instead of sexual orientation etc fine. But as we have seen this is not what Oregons educational system is implementing.

You lower graduation standards and focus on lowering test scores. It appears you are not trying to educate our children but indoctrinate.

Enough is enough. Focus on teaching the basics, not an agenda.
