

Submitter: Chris O'Neill

On Behalf  
Of:

Committee: House Committee On Emergency Management, General  
Government, and Veterans

Measure: HB4083

Honorable Members of the House Committee on Emergency Management, General Government, and Veterans.

Thank you for the opportunity to comment in support of HB 4083. My spouse receives PERS monthly payments as a retired high school Spanish teacher, so I have a direct interest in how public funds are managed. I accept the overwhelming scientific consensus that carbon based fuels contribute significantly to the negative impacts of climate change and will worsen if our government and market institutions don't soon reverse investment in carbon fuel industries that take a short-term view of what "profit" means. Our public investment funds should be managed with a longterm perspective. Please move HB 4083 out of committee "do pass" as soon as possible. Thank you.
