

Submitter: Bob Sowdon

On Behalf Of:

Committee: House Committee On Business and Labor

Measure: HB4080

What a waste of time and materials for what 2.6 gigawatts (2,600 MWh) 18 wind turbines and foundations, 6,800 miles of cable, and dozens of specialized vessels. Are you just plain NUTS? You are aware that this will increase consumer electric bills killing sea birds and running fishing ground, and what an eye sore.

Oregon uses over 48 million megawatt-hours (MWh) per year of electricity, which comes from a combination of hydroelectric (40%), coal (32%), natural gas (17%), land-based wind (7%), nuclear (3%), and other sources (1%)

Get real stop this madness!
