

Submitter: Lucy Hitchcock

On Behalf
Of:

Committee: House Committee On Emergency Management, General
Government, and Veterans

Measure: HB4083

Please vote yes on HB 4083. There is no further excuse for mining or burning or investing in coal. Its pollution is causing further climate warming and breathing pollution, a danger to the health of humanity and the natural world. Investment in it is harming investors needing dependable returns in their retirement. We need a strong statement in the United States for the sake of the world that the use of coal is hazardous and harmful, causing measurable disasters from flooding to fires just this week from California to Chile.

Thank you for all you do to protect our environment and our people.
