

Submitter: Danny Johnson

On Behalf Of:

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4002

It is time for actual leadership not another study. Study groups gave these current, catastrophic problems by the bright ideas that 110 was a sound solution. Let's just legalize drugs. What a mess!!

If the legislature doesn't take drastic measures immediately to restrict drug use AND allow police to firmly enforce the same, Oregon will continue to experience more problems as well as additional users moving into our once beautiful state.

Do not waste our hard earned taxed dollars for another round of individuals who think they know more than those of common sense. Set a firm outcome expectation/goal and put into place the tools to accomplish maximum results.

Getting rid of 110 would be a great start!!
