

Submitter: Joyce Engberg
On Behalf Of:
Committee: Senate Committee On Education
Measure: SB1583

I am opposed to indoctrination of children towards a specific agenda under the guise/mislabeled of equality. School education should be about reading, writing, math, and life skills, not about using taxpayer dollars against the taxpayers will to force innocent minds to be exposed at way too young an age to radical and damaging agendas. I will not vote for any state rep who votes in favor of this bridge too far.
