

Submitter: Mike Slagle

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB1583

I cannot understand why politicians want to take more control over us citizens. This bill takes the power away from duly elected citizens who represent parents and community, who the school administration is also supposed to answer to.

You want to prohibit discrimination, you know what is discrimination? DEI, it is neither equitable nor inclusive. In fact Diversity=conformity, Equity= unfairness and inclusive= exclusion.

Our kids are bombarded by overly sexualized content, through the internet. The average age of a child is 11 years old being exposed to pornography from unmonitored social media exposure. Why would you want to promote more graphic materials in our schools!! I've seen some of the books already in schools, what are we doing?? Let's get back to teaching the skills necessary to be productive, intelligent adults upon graduation. It astounds me you have become tone deaf to parents, and their only liaison could be a school board member to have their voice.

Please stop this madness poisoning our kids minds.
