

Submitter: Kimberly Frakes

On Behalf Of:

Committee: Senate Committee On Education

Measure: SB1583

I oppose SB1583. LGBTQ is not an appropriate context to be taught in school. This subject is very sensitive and does not belong in schools EVER. It is not a teachers right nor the public schools decision to influence our children's very personal decision on whom they choose to be and/or how/whom they choose to love. This subject should not be up for discussion until a child becomes an adult & can make those life altering decisions on their own without outside influences.
