

Submitter: Thomas Dodson

On Behalf Of:

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4002

Dear Committee Members,

I am a retired general and forensic psychiatrist who practiced in Portland for 30 years. I am opposed to spending money to study the addiction problem in Portland. This is money that could be spent more wisely. Studying the problem is not going to make it go away and unlikely to lead to any additional findings that will benefit the public.

Sincerely,

Thomas Dodson, MD
