

Submitter: Wes Brain

On Behalf Of:

Committee: House Committee On Behavioral Health and Health Care

Measure: HB4130

I'm submitting testimony in support of HB4130. Passing this is ever so important. The legislation is needed to keep people from the inappropriate position of being in two places on an issue which opens up opportunity for wrongful practices. A doctor should provide his services while not compromising values that drive monetary compensation. So I'm offering a strong YES for passage of HB4130.
