

Submitter: Shawna Hasel

On Behalf Of:

Committee: Joint Committee On Addiction and Community Safety Response

Measure: HB4002

Measure 110 was a bait & switch. We'll really focus on drug addiction treatment and put money forth to do that, but we'll need to legalize hard drug use to do so...**THAT WAS A CRAZY STUPID IDEA.**

FIRST: The taxpayer money that was supposed to go toward drug addiction treatment programs, mysteriously didn't get there. Not to any meaningful, useful programs, anyway. Where did it go Brown and Kotek??? Now you want to keep the Measure 110 so you can keep wastefully using taxpayer dollars but of course, you'll need more \$\$\$ for more programs. **HOW STUPID DO YOU THINK WE ARE?**

SECOND: Meanwhile, I observed as soon as spring March rolled around that first year after Measure 110 passage, all sorts of drug addicted, now mentally ill people stumbling around outside my office. I've had to call law enforcement twice, for my safety. Of course your profession research group says it has nothing to do with passage of 110, but I sure have seen my community's streets change from that time forward. I do not think HB 4002 is **STRONG ENOUGH!** No teeth.

THIRD: It also did not get created in a bipartisan manner. Republicans were not even allowed into meetings. What all does HB 4002 say anyway, we'd all like to know...Basically you'll need more for programs without meaningful change.

You Democrats appear to like killing & making people permanently mentally ill. But then we could look at where Fentanyl is coming from...another great Democratic idea: **OPEN BORDERS** to let that stuff seep in through the cracks (for another time...). I sadly struggle to believe anything put forth by Oregon Democrats. Just like the bait & switch, they appear to just want more of your hard-earned taxpayer dollars, with no accountability of efficacy. I oppose HB 4002 wholeheartedly. Just look at what Democrats have done to this state after decades in control-
